

## RHIO REPORT

877.865.RHIO

[www.RochesterRHIO.org](http://www.RochesterRHIO.org)

October 2011

### Important Updates

Schuyler Hospital has joined the Rochester RHIO. Schuyler is providing admission/discharge notifications, lab reports and radiology results to the RHIO.

Lakeside Memorial Hospital now provides transcribed reports to the RHIO's health information exchange, in addition to admission/discharge notifications, lab results, radiology reports and radiology images.

Amazing Charts is connected. Practices who use Amazing Charts EHR can receive their ordered and CC'd lab and radiology results electronically through a RHIO interface.

*VHR Users:* Please contact the RHIO Support Team for information about forwarding clinical reports from the VHR to your practice EHR. ([info@grrhio.org](mailto:info@grrhio.org), 1-877-865-RHIO, or use "Technical Support Request" form on the Provider Portal.)

### EPIC Changes

With both URMC and RGHS implementing EPIC systems, healthcare information technology in this region is undergoing many changes. The Rochester RHIO is working closely with both hospital systems to not only continue existing data flows, but also to expand RHIO connectivity with inpatient and ambulatory providers who are moving to one of these EPIC platforms.

The RHIO will provide eResults Delivery for EPIC ambulatory care practices in 2012, so that physicians can receive patient results electronically and instantly from labs and radiology practices throughout the 13 county region. The RHIO is also working to integrate access to the RHIO's health information exchange (VHR) for EPIC users.

### Rochester RHIO Direct

Rochester RHIO Direct makes clinical messaging fast and secure. Use Direct to send and receive physician referrals, as well as to communicate consultation notes. This service is currently available to RHIO users at no charge. No EHR required.

Direct makes referrals as easy as email, and will support "Meaningful Use" requirements for provider-to-provider exchange, as well as for simple electronic delivery of medical records to patients who have a Microsoft Health Vault account. Interested in learning more about Direct? Contact Jessica Neri, Manager of Community HIE Services, at [jneri@grrhio.org](mailto:jneri@grrhio.org), or 585-256-4673.
