# Elysium eME User Workstation Requirements

Elysium EMR users require workstations with the following software. Version numbers are critical.

A PC compatible with a Pentium, or similar processor

4 Gigabyte hard disk drive.

Windows 2000 or Windows XP Operating System

256 MB or more of RAM

A display that supports at least 256 colors and at least 800- by 600-pixel resolution\*

Internet connection: A high speed internet connection such as a cable modem, DSL line or T1 is recommended

[Microsoft](#) Internet Explorer 6 or higher (not including IE 7.x)

For printing, ink jet is a minimum requirement, laser printer preferred

*\*The new Repository user interface is optimized for screen resolutions of 1024 by 768 but is also compatible with screen resolutions of 800 by 600. With lower resolution, more vertical and horizontal scrolling will be required to view all reports and results, particularly on the Summary Tab*
